

17th Annual Salmon Ocean Ecology Meeting, Juneau, Alaska, 29-31 March 2016

The Salmon Ocean Ecology Meeting brings together salmon researchers from the coasts of Alaska, British Columbia, Washington, Oregon and California. This meeting has historically provided an open forum for the exchange of ideas and speculation through the sharing of oral and poster presentations regarding the marine ecology of salmon. The ultimate goal of the meeting is to foster collaboration and communication between researchers working on disparate species and habitats. 2016 will mark the 17th Salmon Ocean Ecology Meeting. For more details see our website at: http://dev-afsc.nmfs.local/ABL/EMA/EMA_SOEM-2016.php

Presentation guidelines:

1. **Oral presentations** will be timed and limited to 15 minutes long. An additional few minutes will follow for questions if the schedule allows.

Presentations should be in a **PowerPoint.ppt** format. Please see your session leader ahead of time to transfer your talk with a jump drive or electronically.

2. **Poster presentations** will be on display the entire meeting. Please post your work ASAP in the designated space (Douglas Room) on the opposing side of the Hall from the main meeting room (Treadwell Ballroom).

Please stand by your poster at the dedicated poster viewing time on Wednesday, 20 March, at 5-6 pm. Attendees will also be encouraged to attend the poster room during breaks, so please feel free to engage people then.
