

RACE/REFM Seminar Series 2015

Tuesdays from 10–11 am
See Individual Flyers for Location

January 13 *From Random Events to Random Effects:
Perspectives From a Data Rich Environment to Environment
Rich Data WITH Applications to Fisheries Management!*
Jim Ianelli

January 20 *Where the Wild Things Are:
A Review of Skate Early Life History
in the Eastern Bering Sea*
Jerry Hoff

January 27 *Acoustic-Trawl Surveys Up North:
Baseline Surveys of the Northern Bering and Chukchi Seas*
Alex De Robertis

February 3 *Modeling Fisher Behavior
Under Changing Policies, Economics,
and Environmental Conditions*
Alan Haynie

February 10 *Untrawlable Habitat Strategic Initiative:
The 2014 Gulf of Mexico Experiment*
David Somerton

February 17 *A 200-Year Archeozoological Record of
Pacific Cod Life History as Revealed Through
Ion Microprobe Oxygen Isotope Ratios in Otoliths*
Tom Helser

February 24 *A Preliminary Approach to Using Predator-Prey Mass Ratios
to Estimate Region-Specific Transfer Efficiency of
Small Neritic Fishes in the Gulf of Alaska*
Matt Wilson

March 3 *A Process for Selecting Scenarios for Projecting Impacts of Future Climate Change
on the Marine Ecosystems of the Northern Hemisphere: The ICES/PICES Contribution
to Model Intercomparison Experiments for Fish and Fisheries*
Anne Hollowed

March 10 *Preliminary Results of the 2014 Underwater Camera Survey of the
Eastern Bering Sea Outer Shelf and Slope*
Chris Rooper

March 17 *Abundance Trends, Diets and Foraging Behaviors of Steller Sea Lions
and Northern Fur Seals: What are They Trying to Tell us About Changes
in the Bering Sea, Aleutian Islands, and Gulf of Alaska?*
Lowell Fritz

March 24 *What Does Pathobiology Do with All Those Blood Samples?
An Overview of Bitter Crab Disease in Alaska*
Pam Jensen

March 31 *Ecology and Assessment
of Alaska Skates in the Eastern Bering Sea*
Olav Ormseth

Contact Jerry.Hoff@noaa.gov for more information or to arrange
for a WebEx connection or access to NOAA's
Western Regional Center.
