

Managing Application users: User authentication and access privileges.

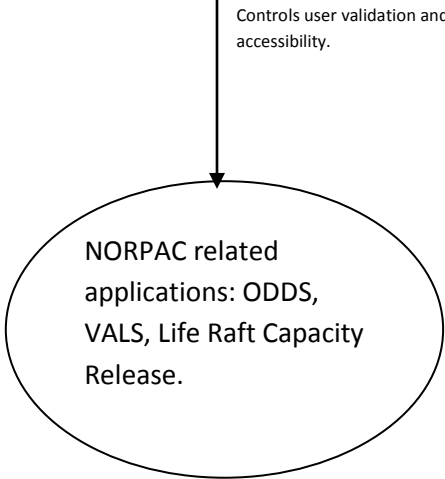

Managing NOAA Users
Query part of NOAA user information (name, email, phone number, and office location.) from NOAA LDAP and stored and managed locally in CUST_AUTH CAM_USER table. Passwords are not copied and NOAA LDAP service is used for NOAA user authentication to control access to applications.

NOAA LDAP	
--------------	--

Managing Non-NOAA (External) Users
Non-NOAA user (external user) information and authentication credentials entered and managed by staff using CAM application

CUST_AUTH	Stores application user information, CAM_APPS, CAM_USERS
